

**1. Scope and applicability**

The documentation associated to this index is intended to provide guidance for:

- (a) EASA Part-145 organisations having their principal place of business located outside the EU Member States; and
- (b) Organisations which are not certified under the provisions of a bilateral agreement signed with the EU and to EASA when acting as the competent authority for those organisations; and
- (c) EASA Part-145 organisations not maintaining Part-ML aircraft.

Note 1: by derogation to the previous points:

- EASA Form 6 (FO.CAO.00157): includes verification of compliance with Part-ML requirements, for a Part-145 organisation dealing with Part-ML aircraft
- the EASA Form 2 (FO.CAO.00155) and associated instructions (WI.CAO-00113) also include the possibility to apply for a Part-CAO and Part-CAMO approval having their principal place of business located outside the EU Member States.

Note 2: any reference given to the CAMO organisation in the documents associated to this index (e.g. MOE User Guide, Aircraft Maintenance User Guide, etc.) has to be considered as including more generically the person or organisation responsible for the continuing airworthiness of the aircraft, as applicable.

Note 3: Part-ML aircraft refer to Article 3(2) of Regulation 1321/2014

2. Contextual documents

Commission Regulation (EU) No 1321/2014 of 26 November 2014 on the continuing airworthiness of aircraft and aeronautical products, parts and appliances, and on the approval of organisations and personnel involved in these tasks, as amended by:

- Regulation (EU) 2015/1088 (first amending regulation)
- Regulation (EU) 2015/1536 (second amending regulation)
- Regulation (EU) 2018/1142 (third amending regulation)
- Regulation (EU) 2019/1383 and corrigendum to Regulation (EU) 2019/1383 (fourth amending regulation)
- Regulation (EU) 2019/1384 (fift amending regulation)
- Regulation (EU) 2020/270
- Regulation (EU) 2021/700
- Regulation (EU) 2021/1963

Commission Implementing Regulation (EU) 2019/2153 of 16 December 2019 - on the fees and charges levied by the European Union Aviation Safety Agency, and repealing Regulation (EU) No 319/2014.

Regulation (EU) 2018/1139 of the European Parliament and of Council of 4 July 2018 on common rules in the field of civil aviation and establishing a European Union Aviation Safety Agency and repealing Regulation (EC) No 216/2008

3. EASA Guidance Material

In the EASA system, three main levels of Regulatory material exist:

- Implementing Rules (IR) are binding in their entirety and used to specify a high and uniform level of safety and uniform conformity and compliance. The IRs are adopted by the European Commission in the form of Regulations.
- Acceptable Means of Compliance (AMC) are non-binding. The AMC serves as a mean by which the requirements contained in the Basic Regulation, and the IR, can be met
- Guidance Material (GM) are non-binding explanatory and interpretation material on how to achieve the requirements contained in the Basic Regulation, the IRs, the AMCs and the CSs. It contains information, including examples, to assist the user in the interpretation and application of the Basic Regulation, its IRs, AMCs and the CSs.

According to 145.A.65(a), "The organisation shall establish procedures.....which comply with the applicable requirements.....Such procedures shall be agreed by the competent authority". The EASA CAO User Guides, should be considered as guidance material published by the Agency when acting as competent authority, to both support applicants and approval holders in the development of the organisation procedures as required by 145.A.65(a) and to ease the approval of the organisation procedures by the competent authority.
